Academic Projects

Personal Portfolio Website (HTML,CSS JavaScript)

Created a personal portfolio website using HTML, CSS, and JavaScript to showcase professional skills and projects.
Implemented a navigation bar for easy access to different sections of the website, including About, Work, and Contact ets.
Designed an engaging "About" section with a brief introduction, presenting yourself as a Java and front-end web developer.
Developed a "Projects" section with a grid layout displaying various projects, each with a title and image thumbnail.

Electricity Bill Management System (Java)

Developed an "Electricity Bill Management System" using Java, providing a comprehensive solution for managing electricity billing processes.
Implemented a graphical user interface (GUI) with Java Swing components, ensuring a user-friendly experience.
Designed a visually appealing interface that includes input fields for Customer ID, Customer Name, and consumed Units.
Utilized a "Calculator" functionality to calculate billing amounts based on predefined charge rates, taking into account different consumption ranges.

Online Restaurant Website (HTML,CSS JavaScript)

This is a Simple Restaurant Website with a main home page, types of food available, a food menu, customer reviews, and a contact form section on the restaurant website.
